

Vortex Water Revitalizer Kitchen Installation

1. Remove the washer located in the envelope reading: Washer for Kitchen Vortex Water Revitalizer.
2. Place the washer in the top fitting of the Kitchen Vortex Water Revitalizer.
3. If there is a screen on the end of your kitchen faucet, remove it.
4. Screw the top fitting of the Kitchen Vortex Water Revitalizer to your kitchen faucet. Use pliers to tighten if needed (use a thick cloth or paper to protect the fitting).

If your tap has an inside thread, use the black plastic adapter located in the envelope reading: Inside Thread Adapter. If you have a pullout kitchen faucet, you will need to purchase a Pullout Faucet Adapter.
